... more than light!

Kanlux S.A. is one of the largest and the oldest Polish companies in the lighting sector. Our products have been sold since 1989, i.e. for almost 20 years now. At the beginning the company's commercial offer was relatively narrow as we concentrated primarily on the light sources and the basic models of fittings. As time flew, larger and larger customer groups became convinced of the quality of the Kanlux products. To meet the growing expectations of the customers we gradually enlarged our commercial offer, paying special attention to its adjustment to the market trends. Among other products, we introduced the architectural fittings and modular system to the market.

The head office of Kanlux S.A. is situated in Silesia. The office building and the multilevel warehouses that belong to us are situated on the site of over 2 hectare area. We act in accordance with the highest world standards, what was confirmed by the ISO certificate that we obtained in 2004. Achieving certificate of the quality management system was preceded by the certifying audit carried out by BVQI, one of the most recognized certification bodies in the world. We have also won numerous competitions and plebiscites, e.g. the "Fair Play Company" title - six times in a row. However, our Company's largest capital is our people. We employ over 200 people and we invest in their development, organizing trainings for them with diversified subjects. Employees' qualifications and commitment to work contribute to our company's dynamic development and its leading position in the electrical and lighting branch.

We highly invite you to start co-operation with KANLUX.
