Description :

- The product is designed to use in shopping rooms

Implementation :

- The fixture can be used to light up rooms, which required high level of light intensity e.g. shop windows, exhibition surfaces, high shopping rooms etc.

Product characteristics :

- High level of light intensity
- Possibility to adjust light position

Fixture :

- Assembly bracket: steel
- Frame and movable part: metal cast
- Glass: hardened glass
- Reflector: matt aluminium

Light source :

- Metal halide lamp two-sided capped – 70 and 150W.

Montage :

- The product is assembled directly in ceiling using catch side spring. The fixture can be installed only on a surface normally flammable (it means that firing temperature amounts at least 200°C and which doesn't deform and soften in that temperature, e.g. wood and wooden-like materials which thicknesses are over 2mm) or non-flammable materials (e.g. metal, plaster, concrete). The fixture required appropriate additional sparking-stabilizing device which is designed to supply metal halide lamp.
